No Web Site, No Problem! A Special Bonus for Business Advertisers!

Did you know that even though you may not have a web site, people can still find your business on the web if you are an advertiser in Everything Equine? Since each issue of Everything Equine is posted on the web, your business can be "Googled" and the issue of Everything Equine that you advertised in will be in the search results. Sometimes it takes a while for the web crawlers to collect the data they need to provide your information in a search, but they will find it. For example, If I searched for Native Wynd Farm, the Febuary issue of Everything Equine is the 3rd result provided. The draw back is that the person searching will not know which page to look for and may give up before they locate Native Wynd Farm on page 12. However, there is an easy remedy for this situation. Going forward, on page 2, there will be a business index. If the prospective client has enough patience to at least scroll down to the 2nd page, he or she can easily see on what page the business is listed.

Jade can't understand why no one has adopted her (and neither can we)! Everyone tells her that she is a wonderful cat. She is such a lover and always ready to accept attention. She also loves to play and is very comical. She has the most beautiful markings. She is about two years old and spayed.

She only wants to find a loving home where she can trust her new family and know she is safe, and in return will shower love on them. She has had some scary experi-

ences in the past and the only thing she asks for is to be the only pet in a household. Jade came to us just as Hurricane Wilma was about to come ashore. She was very scared and nervous but it did not take very long until she came out of her shell and began to be happy again. Won't you be the special person that Jade can count on?

To adopt an animal from us, you must complete an adoption application and be approved. The adoption fee is \$55.00 for cats and kittens. All animals available for adoption are spayed/neutered and up-to-date on all vaccinations.

To meet Jade, please call us at 450-6301 or go to collierrescue.com.

Feeding Free Choice Minerals

When we put a horse in our world – a domestic situation, it then will become our responsibility to meet their needs physically, mentally and emotionally. Attaining the knowledge to make informed decisions about our horses' diet is an obstacle that all horse owners face.

Horses are grazing animals. Their bodies are designed by nature for continuous movement and grazing. Living in the wild they travel many miles and have quite a variety in the diets. They have been observed eating tree bark, dirt, limestone, mineral deposits, herbs and grasses of many different varieties. They know instinctively what their bodies require.

Keeping a horse in a stall, paddock and/or small pasture is unnatural for them. We take away their abilities to balance their own nutritional needs by limiting what is available to them. Cribbing, eating manure, drinking from urine pools, sand colic, stall walking, stall weaving, food aggression and the eating of poisonous plants are a few of the behaviors that horses resort to in an attempt to meet their own needs or act out their frustrations of not having their needs met.

Minerals are an essential part of the structure but they also play an important role in the function of the body. When any of the elements are missing or lacking, the result will be structural weakness and system dysfunction or in other words disease.

The following minerals are generally recognized as essential to good health.

Calcium – a major mineral in the body, essential for normal bones and teeth, nervous and muscular system function, normal heart function and blood coagulation.

Magnesium – Activates enzyme systems, associated with phosphorus, zinc and nitrate utilization. A balancing mineral for calcium.

Copper – Necessary for activation of enzyme systems: helps iron in prevention of anemia: required with iron for formation of hemoglobin. Needed for healthy immune system and disease resistance and protection against internal parasites.

Manganese – associated with phosphorus utilization, iron assimilation, necessary for normal reproduction and part of the bone matrix.

Phosphorus – essential for bone and teeth growth, fat metabolism, Vitamin A & D metabolism and normal reproduction. Should be kept in balance with calcium and magnesium.

Potassium – Essential for carbohydrate metabolism, regulates thyroid, important for basic cellular metabolism and the regulation of fluids in the body. Important for nerve transmission.

Selenium – Required for normal metabolism through its interrelationship with Vitamin E. Helps the immune system.

Zinc – Essential for normal development of skin, hair, bones and eyes. Necessary for certain hormonal reproduction.

When you see how each of these minerals affect the development of life and the effects they have in maintaining healthy life, it is easy to get over-zealous in supplementation. But over supplementing of minerals can cause problems and can cause mineral deficiencies.

Calcium in excess will depress levels of manganese, magnesium, phosphorus and zinc which can lead to ailments like nervous behaviors, mastitis, respiratory ailments and warts.

Magnesium in excess will depress phosphorus and calcium which can lead to deformities, arthritis and founder to name a few.

Copper in excess will depress levels of Iron, zinc and phosphorus. Which can cause problems with reproduction and deformities in bones and teeth.

Manganese in excess will depress iron, phosphorus, potassium and magnesium leading to nervous behaviors, respiratory problems, string halt and navicular disease.

Phosphorus in excess will depress zinc, iron, calcium and magnesium. Ailments like founder, navicular, arthritis, warts, nervous behaviors and possible deformities can be the result.

Potassium in excess will depress sodium, iron and manganese.

Zinc in excess will depress iron, copper and phosphorus.

I think you get the idea.

To be efficiently utilized by the body, minerals must be in an organically bound form which means that they must be chelated or joined to organic substances. The term chelation comes from the Greek word "chele" which means claw. A chelator is a molecule that grabs onto a mineral and holds it like a claw. In the process of manufacturing a true amino acid chelate, the amino acids are chemically bonded to the minerals. This process frees certain by-products such as chlorides, sulfates, carbonates, etc. which NEED to be removed during the manufacturing process to create a pure amino acid chelate. Some manufacturers are simply mixing minerals with amino acids and selling them as amino acid chelates. They are not forming the chemical bonds during preparation and therefore are not removing the by-products necessary for proper absorption.

Recent concerns about the depletion of our soils and the refining of our food has led to mineral supplementation in an attempt to ensure adequate nutrition. Unfortunately, as you can see, taking just any

form of minerals does not ensure that the minerals will be absorbed into the body and utilized by the tissues.

So back to our original question.....should we feed our horses Free Choice Minerals? We believe that research has proven the importance of minerals in our diets and that of our horses. So the real question is the same old question that horse owners always run into! Whom can I trust to give me the best advice on which minerals to feed my horse and whom can I trust to manufacture them? We believe that best source of information on what your horse needs is your horse. Given the choice of taking the minerals that his body needs or risk his health he will go for the mineral. Remember he is a prey animal and his instincts are to survive. Just like his wild counter-parts his body knows what it needs. He just needs to have it available WHEN he needs it in order to maintain balance. Free Choice Mineral feeding can allow your horses to balance themselves.

When force feeding mineral supplements daily, especially a supplement of poor quality, it is very easy to over supplement and cause an imbalance. Horses communicate through body language and most stable vices and "bad behaviors" are only the horse's way, usually out of frustration, of trying to tell you that it needs something and cannot get it. The horse's body feels out of balance and this makes the horse uncomfortable.

Choosing to put your horse on a Free Choice Mineral program is not a decision to take lightly. What you give your horse as Free Choice options is where the knowledge part comes in. We have already learned that for minerals to be efficiently utilized by the body we want to look for a quality product that has been properly chelated and by-products removed. There are companies out there that have been working in the field of Equine Nutrition for 20 – 30 years. You can benefit from their experience and their research. Look for organic and human grade quality ingredients. These products are high in quality and properly balanced. Less is more when the body is balanced.

Before feeding Free Choice Minerals, some factors have to be taken into consideration, such as feeding in group situations, pasture boarding, hay types and hay quality. Each horse's situation is unique and would require individual analysis. Investing the time to do this will give your horse the opportunity to be the best that he can be. And you will be giving yourself the gift and pleasure of his company for many years to come. Minerals.....the key to life and health.

Everything Equine's GIVE-A-WAY

Sponsored by:

The next winner will be luck of the draw!
One winner per month. Currently offering choice of:

Arthrosamine
Total Joint
Health for
dogs

or

Arthrosamine
Total Joint
Health for
humans

Beefy Chewables
60 count
a \$24.95 value

120 count, a
\$39.99 value

Odds of winning are determined by
number of entries.

Congratulations to Wendy of Naples who won
the May drawing.
April's winner was Patricia of Cape Coral.

Correction: April's winner resides in Okeechobee, not Miami as was printed last month.

Congratulations to Linda M. of Englewood, fl. She has won May's drawing for a 2 hour Horseback Safari for two at forever florida! Enjoy the ride, Linda!

There will be another drawing in June, so send in your entry form!

Winner is chosen by luck of the draw. Odds of winning depend on how many entries received.

Must receive entry by the 20th of the month. One entry per person per month. Winner is chosen by luck of the draw.

Horseback Safaris

Horseback Safaris - Standard one-hour, two-hour, or three-hour horseback safaris are available daily. Horseback Safaris can be arranged for riders with varying levels of experience. All guests should be at least 12 years of age; 10 years of age is an acceptable age with proven riding experience. Guests weighing more than 275 pounds will need to be assessed by our Equestrian Director before they are allowed to take a Horseback Safari. Call-in reservations are recommended in order to assure that we and our horses are ready for you.

A favorite with visitors is our two-night "Crescent J Cattle Drive Weekend Safari," which includes some training in Florida Cowhunter skills of ridin', ropin' and cow cuttin'. (Florida cattlemen weren't "cowboys" because hunting those wild Spanish-descent cattle in Florida's woods and swamps was a man's job, they said.) Choice of campground depends on weather, type of group and recommendation of the riding instructors.

Another favorite is similar, but shorter – an Overnight Trail Ride Safari combined with a next-day "Rawhide Roundup." More time is spent riding the wilderness trails of Forever Florida and learning about nature, less on cowpoke skills.

Corporate Co-workers, Schoolteachers, Professional Club, Flying Clubs, School Groups, Church Groups, Families, Friends, Scout troops or multi-troop Camporees – there are activities and a campground on Forever Florida or the Crescent J Ranch that are just right for a bonding experience. See the Facilities and Events page for more details.

From a small primitive one-troop Scout Camp on the Crescent J that has been used by Girl and Boy Scouts for more than 30 years, we expanded to a remote but up-scale campground 'way back in the wilderness of Forever Florida, then added two campgrounds in between and most recently, a large area "up front" (near the highway) that comfortably holds up to twenty Scout troops for a big Camporee.

Variations on these basic campouts and safaris can be worked out with our staff.

a shout out! **LOST HORSE**

This is a BIG THANK YOU to Dr. Lucy Starbuck and LeAnn from Dr. Van Roekel's office. I want to thank you both for taking the camper top off my truck that Saturday evening so I could hook up my trailer to take Danzer to your office. I could not have lifted it off myself.

I said that I do not drive well on Hwy 75, especially at night and pulling a horse trailer with a sick horse to boot. Again, let me thank you for letting me follow you. I appreciate that you only went 65 mph and took your time.

You both went above and beyond the call of duty. Thank you so much for being so understanding, and the muscle power!!!

Cindy Malcolm - Blossom's Ranch

In the misty morning air
 Lay a fine tall mare
 All the others were munching on hay
 While this mare was standing at the bay
 It seemed as though she was waiting for another
 Maybe even her mother

After a while came a bang
 It made the horses have a suspenseful hang
 This great God rose out of the water
 After a while it started to get hotter
 The mare started to rise
 To the other horses this was a surprise

He was taking her home
 To this big white show dome
 The horse family came together
 Like a bird and a feather

Horse tales is an area where original, unpublished works by local writers and artists will be featured. If you have a short story, poem, work of art or anything that you've created and are interested in seeing in print, please submit to Everything Equine. Everything Equine and local businesses provide this opportunity for children and adults alike to show their creative abilities and talents to the entire community. Please limit your submissions to horse related tales that coincide with an equestrian or farm oriented way of life.

"Grasshopper"

Running bold and free, she dominates the
land,

With out-stretched back, high-held head
and tail a mast; blowing carelessly in the
wind.

She glows with an over abundance of
youthfulness,

Impressive for one of her years.

Bursting with energy, she uproots earth
with her powerful limbs.

Expressing her reign, thankfulness of life,
supreme presence and Heart overflow-
ing with the will to run.

She gives her all for me; forever immortal.

Julie Higginbotham

Written for her barrel horse "Grasshopper"

(Skip's Tippet)

Country Appreciation

**The magnificent cities may entwine
their venomous vines**

**Around the sophisticated class and
brand them in their narrowness,**

**But I show faint enthusiasm of the
urban way of life.**

**I escape into the serenity of fortu-
nate fields of wood and dale.**

**The free breeze begins the chants,
chirps and songs of birds,**

**Smells of spring meadows and
whinnying of newborn foals.**

**To one who has learned to appreci-
ate that happiness and freedom?**

There is nothing sweeter.

This rural atavism possesses me.

I am content to never be set free -

**Until I satisfy myself with my last
breath of a country breeze.**

Julie Higginbotham

If horses were software.....

A letter to tech support

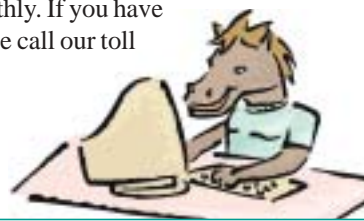

Dear Tech Support,

Recently I purchased and installed Horse 1.0. I soon noticed that this program appears to have numerous glitches. For instance, every time my computer boots up, I have to run Feed 5.3 and Water 7.1. Many times I've been in the middle of writing an important document, and a window will flash telling me to run Clean Stall 2.0. This program also contained applications I did not wish to install, such as Manure 8.5, however they auto-installed with Horse 1.0. Applications such as Vacation 2.7 and Free Time 10.1 can no longer run, crashing whenever selected. Possibly the worst is that Horse 1.0 has attached itself to programs like Finance Manager and MS Money, with folders added such as "Monthly Shoeing" and "Winter Blanket". Periodically, I'll get a reminder telling me to send a check to the manufacturer of Horse 1.0 for the aforementioned items. I have tried to uninstall Horse 1.0 numerous times, but when I try to run the uninstall program, I get warning messages telling me that a deadly virus known as "Withdrawal" will infect my system. Please Help!!!!

Dear User,

Your complaint is not unusual. A common misconception among users is that Horse 1.0 is a mere "utilities and entertainment program." It is not - it is an OPERATING SYSTEM and is designed by its' creator to run everything! A warning will soon be imprinted on the box. Since you have already installed Horse 1.0, here are a few tips on how to make it run better. If you are annoyed by the applications Feed 5.3 and Water 7.1, you may run C:\HIRE HELP, however this will cause another folder to be added to financial applications, labeled "Staff". Failure to send payment to "Staff" will result in Feed 5.3 and Water 7.1 being run again on startup. A note of caution: NOT booting up your computer for several days isn't the solution to avoiding Feed 5.3 and Water 7.1. You will find that, when you boot up your computer again, a nasty virus called "Colic 4.2" will have attached itself to important documents and the only way to rid your computer of Colic 4.2 is by purchasing and installing "Vet 10.1", which we admit is extremely expensive, but crucial. Otherwise, Colic 4.2 will cause irreversible damage to the operating system. Finally, it is important that you run C:\Carrots and C:\Scratch Ears on a fairly regular basis to keep the application running smoothly. If you have any more questions, please call our toll free number.

Sincerely, Tech Support
